

Demounter

Description

The **Demounter** is a machine designed to prevent damaging the printing plates. The Demounter efficiently removes the flexographic printing plates and mounting tape from sleeves, without any damage. Along with saving plates, the machine will also save time and allow the operator to focus on other activities in the prepress department. A motor driven silicon roller generates friction to pull the printing plates and mounting tape off the printing sleeve or cylinder. The roller divides equal force along the entire width of the printing plate, as opposed to the edges, which protects the printing plates from any damage.

Details

The operator loads the printing sleeve onto the shaft (one-size-fits-all), peels of the edge of the printing plate and holds it against the silicon roller.

The foot pedal is pressed to move the silicon roller.

The operator unloads the printing sleeve from the shaft.

Advantages

Reduces costs due to damaged printing plates allowing a quick return on investment

Saves time in prepress department

Easy to use and minimal force required

Rigid steel construction

Plug-and-play

Specifications

Widths: 1700, 2000 and 2500mm

Plates: All thicknesses

Tape: All types

Options

Pneumatic cones for applying tape

Cutting knife

Versions

Sleeves

Cylinders
